

# The Best Buy Teen Tech Center at Project Vida

is a member of The Clubhouse Network.

Our international program provides open-ended exploration through the use of technology and advanced equipment. Using the Learning By Design Model, we encourage youth, especially those in underserved communities, to be curious and experiment with hands-on projects and activities. We provide the freedom to discover and explore different fields of tech and design while supporting members with guidance from mentors and specialist. We foster the growth of a learning community through respect, trust, and celebrate diversity and the minds of young creators.

## Teen Tech Center

## What is available?

- **Art & Design** - Learn or practice traditional art such as drawing, painting, sculpting, etc through design programs like Photoshop, Illustrator, or Procreate, and create illustrations, logos, posters, comics, animations, t-shirts, etc.
- **Music & Production** - Learn or practice writing, singing, rapping, or recording music by using producing software such as Garage Band, FL Studio, and Ableton. Bring an instrument or create a podcast channel in our recording studio and sound booth.

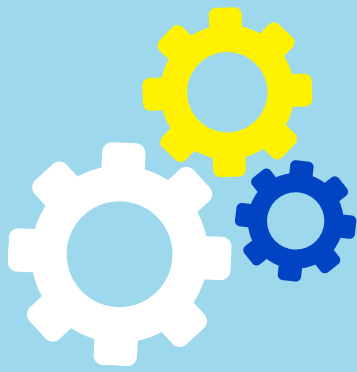

- **Film & Photography** - Learn or practice the art of photography by using our cameras and film space. Manipulate backgrounds with our green screen and become knowledgeable in photo/video editing programs like Photoshop, After Effects, and Premiere Pro.
- **Robotics & Engineering** - Create video games and learn to code using programs like Scratch. Utilize the Makey Makey circuit boards to manipulate existing games and their controls, explore the design side of robotics, and use our 3D printer to make parts for robots or other operational machines.

### We assist with:

- Academic performance
- Tutoring
- Homework
- Career experience and readiness
- Workshops
- Field trips
- Internships/partnerships (often paid)

### Benefits/ Opportunities

Youth can participate in local, national, and international competitions and events. Along with collaborating with local partners, and even other Teen Tech Center members across the globe.
